AIM: To Study Agile Methodology and Test case Management using JIRA Tool

Theory:

Jira is a software development tool that helps team's plan, track, and release software projects. It's a popular tool among software development teams.

JIRA is a widely used issue tracking and project management software developed by Atlassian.

The theory behind JIRA revolves around several key principles and concepts:

Issue Tracking: At its core, JIRA is designed to help teams track tasks, bugs, features, and other issues within a project. It provides a centralised platform for capturing, organising, and prioritising these items.

Agile Methodologies: JIRA supports agile methodologies such as Scrum and Kanban, enabling teams to plan, track, and deliver work in iterative cycles.

Agile principles emphasise collaboration, adaptability, and delivering value to customers.

Workflow Management: JIRA allows teams to define custom workflows that represent the lifecycle of an issue from creation to completion. Workflows can include various statuses, transitions, and conditions to reflect the specific processes followed by the team.

Customization: One of the key strengths of JIRA is its flexibility and customization options. Teams can tailor JIRA to their specific needs by creating custom issue types, fields, workflows, and project configurations.

Collaboration and Communication: JIRA facilitates collaboration among team members by providing features such as commenting, mentioning, and attaching files to issues. It also integrates with other Atlassian products like Confluence and Bit bucket for seamless communication and knowledge sharing.

Reporting and Analytics: JIRA offers robust reporting and analytics capabilities, allowing teams to gain insights into their project progress, team performance, and other key metrics. Users can create custom dashboards, charts, and reports to monitor and analyse project data.

Integration: JIRA integrates with a wide range of third-party tools and services, including development tools, CI/CD pipelines, customer support systems, and more. This

integration ecosystem enables teams to streamline their workflows and improve productivity

Scalability and Performance: JIRA is designed to scale with the needs of growing teams and organisations. It can handle large volumes of data and users while maintaining performance and reliability.

Name: Hitesh Bhatia Roll No.: 2301012 Batch: T11 Subject: SEPM

The image shows two screenshots of the Jira web interface. The top screenshot is the 'Confirmation | Atlassian' page for Jira On-Demand. It features the Jira logo and the heading 'Jira's better when used together'. Below this, it says 'Jira works better with your team onboard. Invite a teammate to try it out with you.' There are two options to share the link: 'Share via link' with a text input field containing 'https://tsect23.atlassian.net?continue=https%3...' and a 'Copy link' button, and 'Invite via email' with a text input field containing 'e.g. maria@company.com'. At the bottom, there is a 'Do this later' link and a 'Go to Jira' button. The bottom screenshot shows the Jira 'My Team' space. The left sidebar has a search bar, a '+ Create' button, and a 'Premium trial' badge. The main content area shows a Scrum board with columns 'TO DO', 'IN PROGRESS', and 'DONE'. The 'TO DO' column has two tasks: 'Task 1' (Feb 8, 2026) and 'Task 2' (Feb 13, 2026). The 'IN PROGRESS' column has one task: 'Task 2' (Feb 13, 2026). The 'DONE' column is empty. A 'Complete sprint' button is visible at the top right of the board. The bottom of the image shows a Windows taskbar with various application icons and a system clock showing 1:22 PM on 2/3/2026.

Quickstart

This screenshot shows the Jira interface for the 'T23 Team' space, specifically the 'Backlog' view. The left sidebar contains navigation options like 'For you', 'Spaces', and 'Recent'. The main content area displays a search bar, a '+ Create' button, and a list of work items. Two items are visible: 'SCRUM-1 Task 1' with a 'TO DO' status and due date 'Feb 8', and 'SCRUM-3 Task 3' with an 'IN PROGRESS' status. The bottom of the screen shows the Windows taskbar with various application icons.

This screenshot shows the 'For you' dashboard in Jira. The left sidebar has 'For you' and 'Spaces' selected. The main area features a 'Recent spaces' section with a card for 'T23 Team' showing 'My open work items' and '1 board'. Below this, there are tabs for 'Worked on', 'Viewed', 'Assigned to me' (selected), 'Starred', and 'Boards'. A 'TO DO' section lists 'Task 1' for 'SCRUM-1 - T23 Team'. On the right, there is a 'Confluence' promotional banner. The bottom of the screen shows the Windows taskbar and a URL bar with a complex query string.

Conclusion: Hence, we have successfully implemented Agile Methodologies in JIRA.
